SUMMARY

Computer Science and Engineering graduate (2025) and Software Development Engineer with 2+ years of experience designing, building, and deploying scalable, fault-tolerant web applications. Strong in data structures, algorithms, object-oriented design, problem solving, and complexity analysis, with hands-on experience in C++, Python, distributed multi-tiered systems, REST APIs, relational databases, and cloud deployment. Comfortable taking broadly defined, ambiguous problems from design to production in fast-paced agile teams.

EDUCATION

B.Tech in Computer Science and Engineering – Abacus Institute of Engineering and Management 2025 | CGPA: 8.85 / 10
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Design & Analysis of Algorithms, DBMS, Operating Systems, Computer Networks, Discrete Mathematics, System Design
Class XII (WBCHSE) – Sihar Adhar Mitra High School, West Bengal • **Class X (WBBSE) –** Ramakrishna Mission Sarada Vidyapith 85.6% · 2021 | 78.85% · 2019

TECHNICAL SKILLS

Programming Languages: C++, C, Python, JavaScript, TypeScript, PHP
Computer Science Fundamentals: Data Structures, Algorithm Design, Object-Oriented Design (OOP), Complexity Analysis, Problem Solving, System Design, SDLC
Backend & APIs: Node.js, Express.js, REST APIs, WebSockets, OpenAI / LLM APIs
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite
Databases: MySQL (relational / SQL), MongoDB, Prisma
DevOps & Cloud: AWS (EC2), Docker, GitHub Actions, CI/CD, Vercel, Netlify, Linux, Git
Testing & QA: Jest, Postman, Unit Testing, API Testing, Debugging, Selenium (basic)
Practices: Distributed Systems, Agile, Responsive Design, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer – Sylo Energy (Konastha Technologies Pvt. Ltd.) Jun 2025 – Present

- Build and maintain web and mobile portals for renewable-energy asset monitoring serving 500+ active users, designing scalable, fault-tolerant solutions within an agile delivery cycle.
- Develop backend services and RESTful APIs using Node.js, Express, and Python, integrated with NoSQL databases and cloud infrastructure to support high-throughput data processing.
- Implement responsive React front-ends and cloud integrations, improving system functionality, reliability, and end-user experience.

Web Developer Intern – Null Class Apr – Jul 2024

- Engineered a real-time video-calling platform with gesture controls and time-limited VoIP, supporting 100+ concurrent users in a distributed environment.
- Optimized backend processes and query handling, reducing latency by 20% for high-traffic sessions.
- Collaborated cross-functionally on API development, database management, and performance tuning.

Web Developer Intern – PHN Technology Pvt. Ltd. Apr – May 2023

- Improved healthcare web-application performance, achieving 25% faster load times through backend and query optimization.
- Contributed to 10+ deployment-ready solutions including analytics dashboards and patient-management tools.

Freelance Web Developer – Fiverr 2022 – Present

- Delivered 20+ custom, mobile-responsive web applications with 95% client satisfaction, boosting client reach and engagement by 30% through modern frameworks, SEO, and performance tuning.

PROJECTS

Interview Notifier – Full-stack job-application tracker with dual-AI integration (Gemini + DeepSeek), a resume-job matching algorithm (85% accuracy) over a 200+ skill database, PDF parsing, email analysis, and a deadline-notification calendar. | [Firebase](#), [JavaScript](#), [AI APIs](#)

Smart Waste Management System – AI-IoT platform for waste segregation, disposal tracking, and sanitation alerts built on distributed cloud services to improve urban hygiene. | [Node.js](#), [Python](#), [TensorFlow](#), [Arduino](#), [Cloud](#)

Math Notes – Real-time interpreter that recognizes and solves handwritten mathematical equations using computer vision and deep learning. | [Python](#), [OpenCV](#), [TensorFlow](#), [Gemini AI](#)

College Coding Club Platform – Scalable learning platform serving 500+ students with centralized coding resources and event access. | [Node.js](#), [React](#), [Firebase](#), [Tailwind CSS](#)

LEADERSHIP & ACTIVITIES

Coding Club Leader – Abacus Institute of Engineering and Management Jun 2021 – Present
Mentored 50+ junior students and organized 10+ technical events and workshops, building a stronger coding and collaboration culture.

Hackathon Team Leader – Hack-o-Med May – Dec 2023
Led a cross-functional team of 5 from ideation to working prototype, delivering an innovative healthcare solution.

CERTIFICATIONS & ACHIEVEMENTS

- 2nd Place, Python Coding Competition – Capsule Lab.
- Certified Ethical Hacker (EC-Council); trained in Machine Learning Pipelines using Azure ML Studio.
- Organized and hosted an Inter-College Coding Event, coordinating 100+ participants end to end.
